

Chicago Flap Cadaver Dissection Skills Workshop

November 1, 2012

Chicago area, Illinois

The Post-CLESS Flap Cadaver Skills Workshop is a hands-on course that offers participants the opportunity to learn basic and complex foot and ankle soft tissue flap indications, techniques, post-operative management and potential complications from experienced faculty. This specialized course will include didactic lectures and cadaveric dissection. Loupe magnification is recommended. There will be no more than two participants per cadaver. 10 CME credits will be offered (pending final approval).

Preliminary workshop exercises include:

- Fillet of toe flap
- Rotation/advancement flaps
- Medial plantar artery flap
- Lateral plantar artery flap
- Abductor hallucis muscle flap
- Adductor digit quinti muscle flap
- EDB muscle flap
- Lateral supramalleolar skin flap
- Reverse sural artery flap
- Gastrocnemius muscle flap
- Soleus muscle flap
